(Community Partnership/ Integrated Neighbourhood Team / Suffolk
County Council Match Funded Project)

Developing physical literacy in children aged 2-5 and improving their school readiness and social mobility (physically, socially, emotionally)

Physical activity is fundamental in the early years of a child's life. It helps children to acquire a range of new skills such as language and numeracy, develop their brains and establish the building blocks for an active and healthy life.

The purpose of the project is to ensure that every child in the area gets the opportunity to achieve a good level of physical development linked to their language and literacy skills. In doing so, it will increase the children's self-esteem and wellbeing, develop agility, balance and co-ordination which all help children gain a better start to their life.
