Community Farm

A guided tour on behalf of the Greenprint Forum

This Community Farm brings a unique venture to harness opportunities for life-long learning, developing partnerships with other organisations and agencies, connecting people with their community, and living healthier and happier lives.

Owner David Chenery and his team are keen to share their learning with other members of the community, offering volunteering opportunities for hands-on experience on a working farm as well as hosting a Care Farm, Forest School, Ofsted "Outstanding" Holiday Club, and Home Education classes, enabling cross-experience learning through caring for animals, growing plants and vegetables, and the exploration of nature.

So come and join our guided tour of this local community voluntary-run farm. As well as being fun, with opportunities to meet and feed some of the lovely animals, we hope that this will be an opportunity for our members to learn from and be inspired by their approach, and even take away ideas to bring back to your own community.

Imagine if we had a community farm in every village or town – what a difference that would make!

Saturday 9 April 2022

10:00-12:00
