

SUMMER 2022 YOUTH VOICE REPORT

Carlton Colville, Kessingland, Southwold
& villages

This term, we received some responses from across the patch including Mutford and Carlton Colville. These will be raised with the right people in the area.

Thank you to those that participated - and please continue to share your opinions and solutions with Youth Voice!

50% Of comments related to sports facilities in open spaces

The main demand was for more football goalposts in Carlton Colville and Mutford. We will share these suggestions with local parish councils and councillors.

TREES!

Another ask in this term's youth voice was about planting more trees in open spaces. Adding features like trees not only make areas look better but they also help the environment! We will feed this back to local stakeholders to consider.

COMMUNITY FACILITIES

It was raised about community facilities around Bramfield and the link to Halesworth. It was suggested about having community facilities that Halesworth and surrounding areas (including villages like Bramfield) can use. Youth research is currently underway in the Halesworth area about what youth provision may look like in the area going forward. We will update on the key findings in future Youth Voice reports! In this term's report, it was also mentioned about an overgrown tree on the park that backs onto the school and how it would be good to update play equipment including free open gym equipment. We will share these suggestions with the right people!

LOCAL NEWS - DOUBLE!

The local Communities officer is in the early stages of working with others on a plan for a street art project at Carlton Meadows. It will involve skate coaching and the aim is for some taster and consultation events in Easter 2023. Keep your eyes peeled!

Southwold Skatepark had another community event on 14th August 2022 - the weather was great and those who attended had a great time!
