

Plastic Action Southwold

There is now an estimated average of 70kg of plastic litter on every square kilometre of the floor of the ocean (Eunomia)

Help us stem the tide of plastic pollution and join our beach clean combined with a survey of the marine litter found. This will help the Marine Conservation Society quantify the scale of the issue around the coastline of Britain and campaign for positive change in an evidence-based way.

Saturday 16th September 2023 at 14:00

We will meet at the big car park just to the north side of the pier in Southwold. Bags will be provided. If you have a stick please bring it, though we do have some to loan out, and wear clothes you don't mind getting a bit grubby.

All are welcome but please register here if you plan to attend so we know who and how many to expect:
