

# Worlingham Neighbourhood Plan Examination

Responses to Examiner's query in connection to  
biodiversity net gain

13 June 2022

## East Suffolk Council

The changes proposed by Worlingham Parish Council to the wording of policy WORL14 and to the policy's supporting text are well written and support the Neighbourhood Plan objective E that "green spaces, wildlife habitats, landscapes and heritage assets that define the character and natural environment of Worlingham will be protected and enhanced." The policy takes a positive approach to enhancing the natural and local environment.

East Suffolk Council's Ecology Officer and Planning Policy Officers provided Worlingham Parish Council with support and advice during the development of the proposed changes and support the policy's aims.

## Broads Authority

Only the comment I have said before. Don't think they addressed or answered it...

My comment is a repeat from before – did you want to state the scenarios or the tests that developers need to meet in order to be permitted to provide the BNG off site?
