

## NOT PROTECTIVELY MARKED

Meeting:	Delivery Steering Group
Date:	9 <sup>th</sup> Aug 2024
Location:	MS Teams
Chair:	R. Bull
Attendees:	R. Bull SZC (Chair) D. Peacop SZC P. Ridley ESC I. Nunn SCC
Apologies:	None

### Meeting Notes:

#### 1 SZC WATER RESILIENCE STRATEGY

- RB confirmed that SZC had reflected on the proposal to utilise a source of water at Sternfield and noted the responses received from local stakeholders and residents on the plans, along with the strength of feeling on the matter. The project had decided that it would not move forward with scheme and focus on alternative contingent water supplies where required. This was noted by the meeting.
- For water demand in the coming weeks/months, SZC will abstract water from two existing licensed abstractions close to the construction site, within the EDF Sizewell Estate. Any additional water requirement will be moved to the site by tanker from outside of the local area using the designated haulage routes set out in the Construction Traffic Management Plan.
- PR stated that it was important that SZC clearly communicated the overall strategy for water supply to provide reassurance to local stakeholders. DP agreed and suggested that a presentation should be included and the next Main Site Forum to run through the strategy. It was also noted that there was an existing action to update the DSG on the proposed 2025 water supply strategy by 1<sup>st</sup> November 2025, which aligned with this timing and approach. This was agreed.

#### 2 DSG DECISION

- The DSG noted that SZC had withdrawn the request to move water by tanker from Sternfield to the main construction site.

### Actions Update:

Date Raised	Ref.	Description	Lead	Date Due
2 <sup>nd</sup> July 2024	3	SZC to update the DSG on the proposed 2025 water supply strategy in future meetings	SZC	1 <sup>st</sup> November 2024
9 <sup>th</sup> August 2024	1	SZC to present the overall strategy for water supply at the next Main Site Forum	SZC	15 <sup>th</sup> October 2024
